Library Card for Archives in Library –
by Shomit Sirohi
(way to browse through the library)

Introduction

Once one has got the examples of how to browse

through the library – one can print it out, and juxtapose more to create a reading of the Library – like mixing social science by Uma Chakravarti and simple Buddhist art interpretations on

the same lines – such things can be called how to research – this library is at the level of an Argentine method of libraries – one can even find Quartega y Ziet and Borges in it – and merge it with

some research like Marxist Grundrisse and produce the reading – Borges and Marx by means of Bruno Bosteels – which argues on sets, class and individuality as a philosophical

method in Marxism – to be poetic and individualist (early Marx)

I. A – Marxism
II. B – Contemporary Philosophers
III. C – Forms of Althusser

IV. D – Sirohi, and Sirohianism
V. E – Black Rights and Novels, even Literature

Now just complexly read this with Soviet Library method – that there is A, I –

and Greimas Square recently – so also in the previous section literature and Marx

In the first section Slavoj Zizek and Sirohi published in a Directory – so

it reflects the whole library.

There is in B – III something like a shelf of German Idealism recently in the B section, and even Heidegger’s Being and Time published –

earlier some writings on method, and say social structure and forms of consciousness before Heidegger in the shelf – in line with this also in fact some materialist writings on

Spinoza and Ted Stolze again on a shelf.
